Embellish a Workspace with Elegance, a geometric design with just a hint of color, and antiqued version with a subtle splatter of natural moss screens offer architectural and acoustic options for business spaces.

THE BENEFITS

Health

The preservation process involves solely unharmed & biobased materials, guaranteeing 100% biodegradable, hypoallergenic and non-toxic products.

Absorbing ambient noise from above

Maintenance

Preserved plants and mosses for indoor use only. That being said, they require no maintenance whatsoever: neither watering, pruning, nor even sunlight.

Nature connected to the ceiling

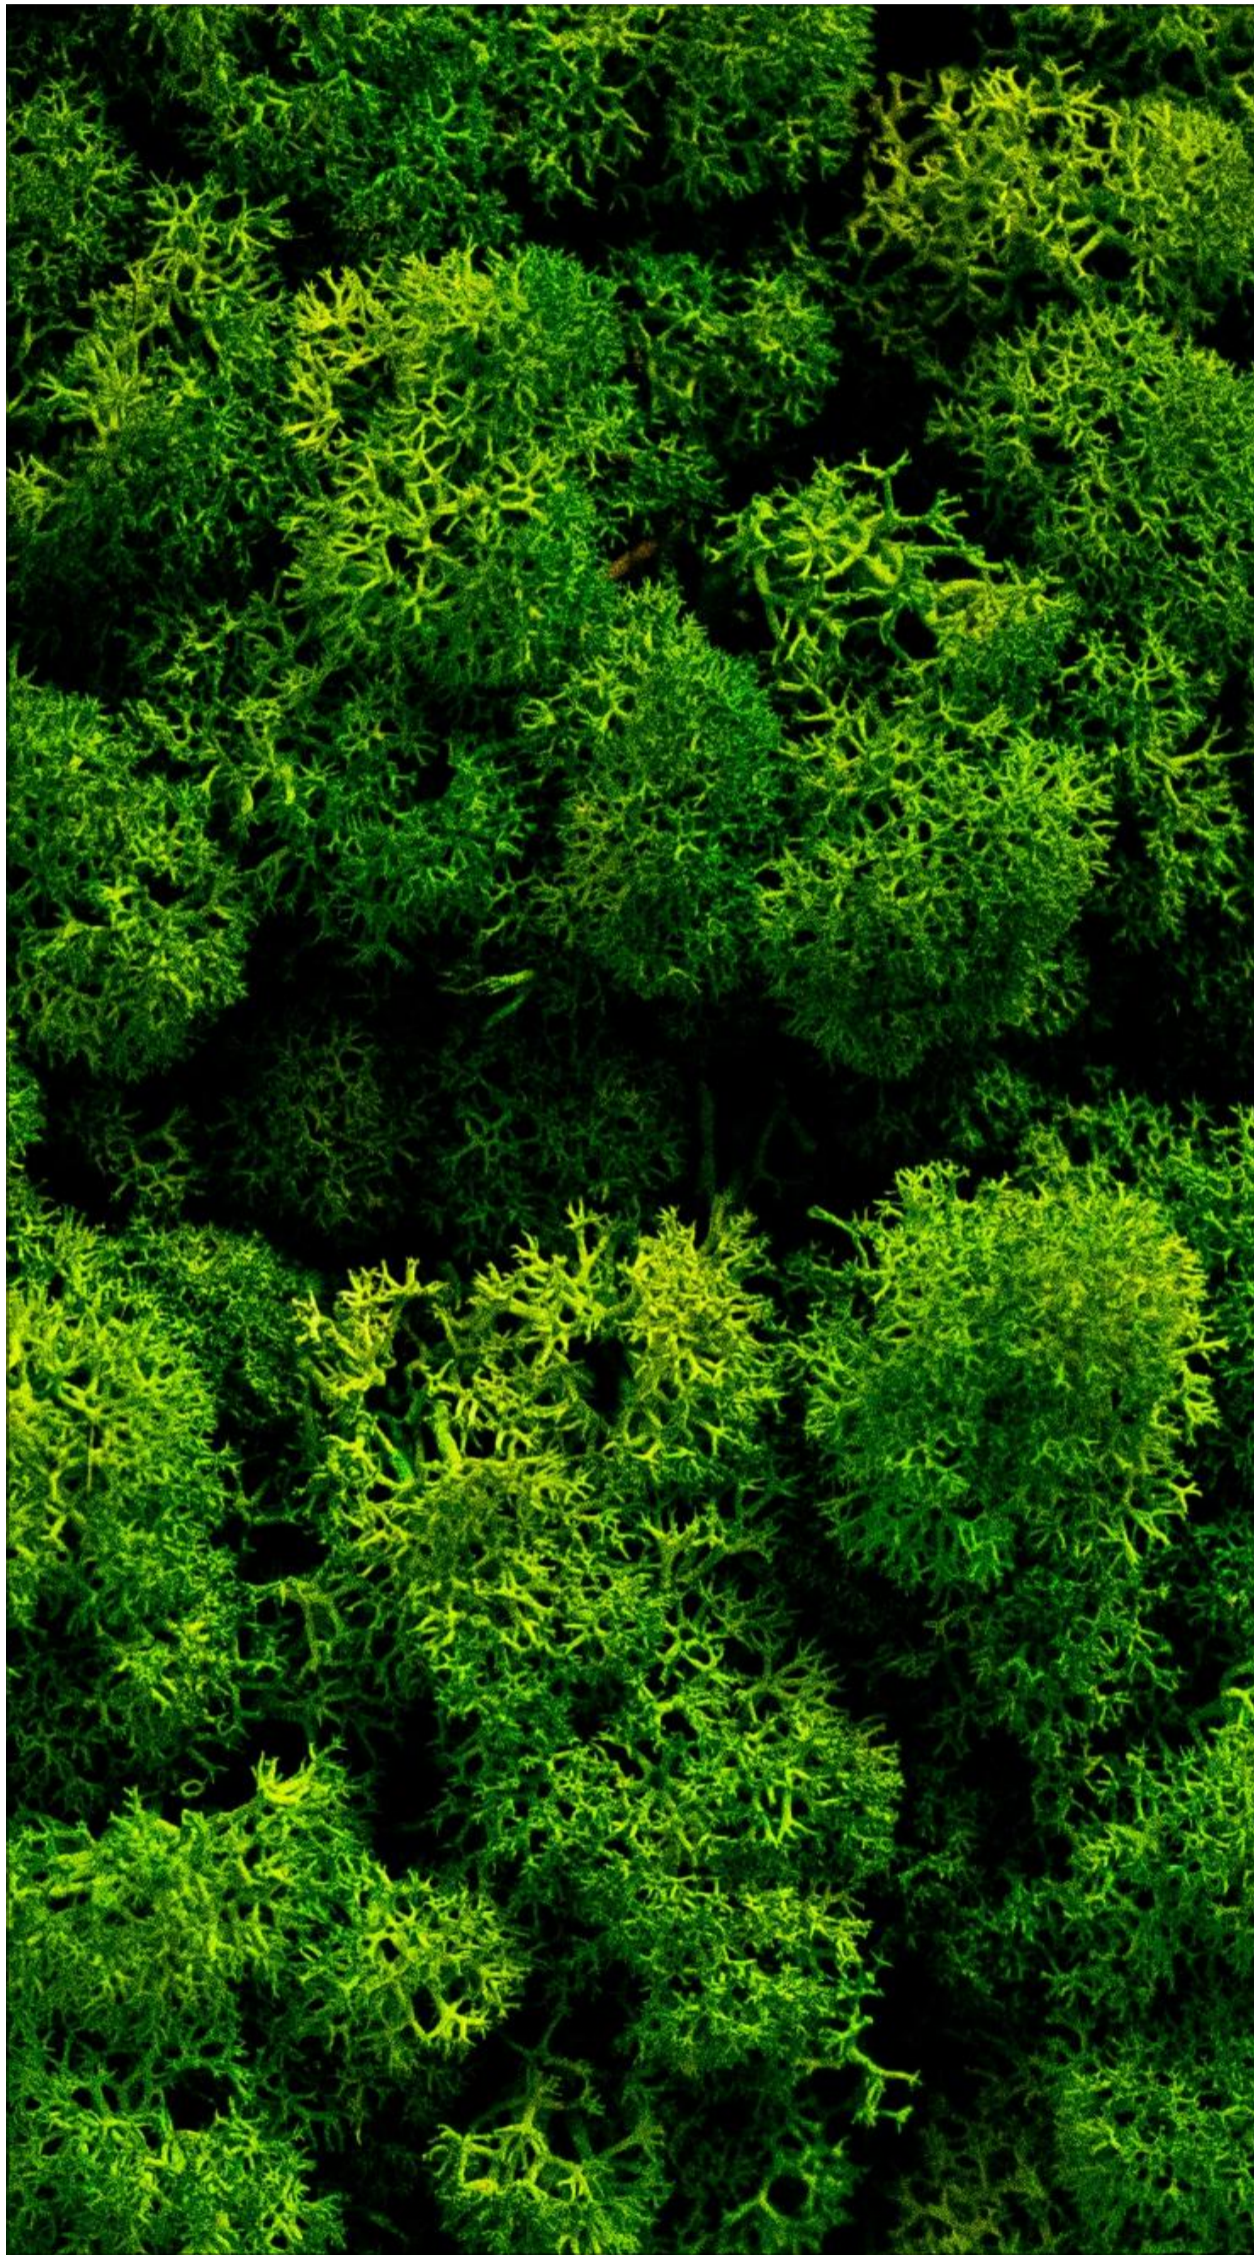

Durability

To achieve optimal durability, it is recommended to avoid exposure to direct sunlight and proximity to water or heat sources. As moss dries out when its environment does, it is strongly advised to avoid touching it. It will get back to the soft touch when humidity rises again and is a good humidity indicator.
